

Ontario CleanTech Trade Mission to China November 5 – 13, 2015

November 13, 2015

Sam Visaisouk, CEO, Tyromer Inc., is pleased to announce that Tyromer had a successful participation on the recent Ontario CleanTech Trade Mission to China led by Premier Kathleen Wynne.

Sam Visaisouk met with potential licensees and JV partners in Nangjing, Shanghai, Hong Kong and Beijing. Many Chinese reclaimed rubber producers were genuinely interested in the non-chemical solvent devulcanization technology offered by Tyromer.

Following these meetings, the China Rubber Industry Association invited Tyromer to present its environmentally sustainable rubber devulcanization technology to its members at its upcoming annual meeting in Shanghai.

Sam Visaisouk (centre), attended the Ontario-Jiangsu Cleantech seminar in Nangjing on November 6, 2015.
